Hello Vern,

I was just following up with you on the status of the reclamation. The inspection was done on July 28th. I identified areas of thistle weed that needed to be removed and to gravel the stretch of road that needed to be repaired (see attached copy of the inspection report).

Has been any progress on this and do you plan to apply for the bond release by the end of this year? If you do want the release before the end of the year, I would suggest getting the reclamation done as soon as possible and submitting the bond release application. This way, I can get the inspection done before the cold weather sets in where it may be hard to access the site. ~April
